SUBJECT INDEX

Age, role, caloric requirements of malnourished persons (abstract), 226
Albumin
  jejunal secretion, intrajejunal elemental diet perfusion effect (abstract), 289
  serum concentrations, coronary heart disease and (abstract), 290
  supplementation, serum albumin prediction after, pediatric patients (abstract), 43
Amino acid profile, role, septic encephalopathy (abstract), 42
Amino acids, clearance studies, hemodialysis patients (abstract), 172
A.S.P.E.N.
  discipline committee reports, 93
  new members, 46
  standards of practice, home nutrition support, 65
  strategic plan, 138
A.S.P.E.N. News, 26, 135, 199, 292

Body composition, energy expenditure variability and, premenopausal women (abstract), 173
Bronchopulmonary dysplasia, nutritional management of infants with, 127
Broviac catheter, ten-year survival, case report, 74
Burn injury, resting energy expenditure in patients with (abstract), 225

Calcium glycerophosphate, TPN in low-birth weight infants, comparison, conventional mineral salts (abstract), 170
Calendar of events, 48, 64, 109
Calorie, requirements and supply, critically ill patients (abstract), 288
Calorimeter, modular indirect, long-term measurement in ICUs (abstract), 40
Calorimetry, indirect, clinical nutrition role, 207
Cancer
  cachexia, reversal by cimaterol and supplemental nutrition, rat (abstract), 124
  taste and smell threshold measurement (abstract), 169
Carbohydrate, low vs. high liquid meals, exercise performance, chronic airflow obstruction (abstract), 88
Cardiac cachexia, tumor necrosis factor concentrations in patients with (abstract), 170
Cerebral palsy, stature estimation from knee height (abstract), 123
Cimaterol, combined with supplemental nutrition, cancer cachexia reversed by, rat (abstract), 124
Commentary, Nutrition support and health care reform—the work to be done, 252
Contamination, bacterial, reduction, enteral nutrient solutions, 31
Coronary heart disease, serum albumin and (abstract), 290
Crohn's disease, enteral nutrition vs. drug treatment (abstract), 86
Current literature, 40, 86, 123, 169, 225, 288
Cystic fibrosis, resting energy expenditure increased in (abstract), 289
Cytochrome P450, infectious stress and malnutrition effects rat liver (abstract), 123

Diarrhea
  bulk-forming cathartic effect, tube-fed patients (abstract), 42
  psyllium hydrophilic mucilloid therapy, enteral nutrition (abstract), 40, 87
Dietetics
  educational preparation, impetus for change, S9
  nutrition support in 21st century, S22
  research development, progress and expansion, S15
Dietitian
  brief history of A.S.P.E.N. dietitian's committee, S1
  changing role in clinical practice, S5
  present and future, S18
Diverticular disease, nutritional status related to length of hospital stay (abstract), 225
Duodenal mucosa, trophic action of epidermal growth factor (abstract), 126

Editorials
  Applications of biotechnology in nutrition, 3
  Indirect calorimetry: the search for clinical relevance, 203
  Nutrition in inflammatory bowel disease, 51
  Reflections on home infusion therapy, 255
  The importance of the mucosal immune system, 99
  Use of lipids in enteral and parenteral nutrition, 151
Elemental diet, intrajejunal perfusion, jejunal secretion in response to (abstract), 289
Encephalopathy, amino acid alterations and, sepsis syndrome (abstract), 42
Energy expenditure
  resting
    asymptomatic HIV-infected men (abstract), 88
    cystic fibrosis gene and (abstract), 289
    patients with thermal injuries (abstract), 225
  variability, premenopausal women (abstract), 173
Energy intake, children with spastic quadriplegia (abstract), 171
Enteral nutrition
  bacterial contamination of solutions, reduction of, 31
  bulk-forming cathartic effect, tube-fed patients (abstract), 42
  Crohn's disease, comparison, drug treatment (abstract), 86
  glutamine content of whole proteins, 77, 133 (letter), 197 (letters)
  immediate postoperative, after abdominal surgery, rat (abstract), 288
  in critically injured patients, 117
  new formula, malnourished children (abstract), 125
  psyllium hydrophilic mucilloid added to, flow characteristics (abstract), 87
  selection of optimal lipid sources, 152, 291 (letter)
Epidermal growth factor, trophic action, human duodenal mucosa culture (abstract), 126
Exercise, effect of high- and low-carbohydrate meals, chronic airflow obstruction (abstract), 88

Fat, intravenous emulsions, in total nutrient admixture, 187
Fatty acids, essential, clinical observation, 179
Feeding tube, bedside postpyloric placement, 284
Furosemide, long-term therapy, thiamine deficiency in patients receiving (abstract), 41

Gastrointestinal tract, immunologic structure and function, 100, 291 (letter)
Gene expression, dietary patterning, 16
Glutamine, protein-bound, implications for enteral formulas, 77, 133 (letter), 197 (letters)
Glutathione, infectious stress amd malnutrition effects, rat liver (abstract), 123
Graft versus host disease, small bowel transplantation (abstract), 89
Growth hormone, adverse metabolic effects, 27

Health care, financing crisis, A.S.P.E.N. keynote address, 246
Hemodialysis, amino acid clearances in patients receiving (abstract), 172
Hormones, energy expenditure variability and, premenopausal women (abstract), 173
Hospital
  cost reduction, nutrition support team recommendations, 227
  length of stay, nutritional status related to, diverticular disease (abstract), 225
Host metabolism, HIV effect in early asymptomatic stage (abstract), 88
Human immunodeficiency virus, resting energy expenditure and substrate oxidation in asymptomatic men with (abstract), 88
Hyaluronan, jejunal secretion, intrajejunal elemental diet perfusion effect (abstract), 289
Hypomagnesemia, diagnosis and management (abstract), 123

Illness, severity, energy metabolism and, pediatric ICU (abstract), 171
Immunoglobulin, jejunal secretion, intrajejunal elemental diet perfusion effect (abstract), 289
Infection, experimental, liver glutathione and cytochrome P450 activity, rat (abstract), 123
Inflammatory bowel disease
  home hyperalimentation for, 70
  nutrition support in, 53
Insulin, deficiency, chronic undernutrition effect, diabetic rat (abstract), 169

Letters to the editor, 133, 197, 291
Lipids
  kinetic measurements, critically ill patients (abstract), 86
  optimal sources, selection, enteral and parenteral nutrition, 152, 291 (letter)

Malnutrition
  caloric requirements, effect of age on (abstract), 226
  elderly ambulatory medical patients (abstract), 125
  pediatric, new enteral feeding (abstract), 125
Mechanical ventilation, weaning, current controversies (abstract), 87
Metabolic stress, lipolytic response, critically ill patients (abstract), 86
Molecular biology
  dietary patterning of gene expression, 16
  nutritional applications, 5

New products, 145, 201, 295
Nitrogen balance, determinations, clinical setting, 231
Nutrient intake, children with spastic quadriplegia (abstract), 171
Nutritional immunology, history of (abstract), 41
Nutritional support, adverse effects of growth hormone, 27
Nutrition News, 44, 90
Nutrition research, animal models, 37
Nutrition support
  assessment and delivery, large teaching hospital, 271
  inflammatory bowel disease, 53
  selection of regimens, 239
  weighted feeding tubes, bedside postpyloric placement, 284
Nutrition support team
  A.S.P.E.N. survey results, 296
  recommendations for hospital cost reduction, 227

Octreotide, short bowel syndrome, 81

Parenteral nutrition
  albumin supplementation, serum albumin prediction after, pediatric patients (abstract), 43
  enteral nutrition combined with, severe trauma, 113
  home
    current status, 256
    substance abusers, 264
    ten-year survival of a Broviac catheter, 74
  home cyclic, oral nutrition in patients receiving (abstract), 124
  selection of optimal lipid sources, 152, 291 (letter)
Patient outcome, chronic ventilator-dependent unit (abstract), 172

Pediatrics
albumin supplementation in parenteral nutrition, prediction of serum albumin after (abstract), 43
bronchopulmonary dysplasia, nutritional management of infants with, 127
energy metabolism, illness severity and (abstract), 171
new enteral feeding, malnourished children (abstract), 125
spastic quadriplegia, energy and nutrient intakes (abstract), 171
TPN in low-birth weight infants, calcium glycerophosphate vs. conventional mineral salts (abstract), 170
Psyllium hydrophilic mucilloid, addition to enteral solution, flow characteristics (abstracts), 40, 87

Selenium, deficiency, long-term TPN, 175
Sepsis syndrome, role of amino acid profiles in septic encephalopathy (abstract), 42
Short bowel syndrome, octreotide management, 81
Small bowel, transplantation, graft versus host disease (abstract), 89
Smell sensation, electrical thresholds, cancer patients (abstract), 169
Somatostatin, physiological effects, short bowel syndrome, 81
Stature, estimation, from knee height, cerebral palsy (abstract), 123
Substance abuse, home intravenous therapy and, 264
Substrate utilization, patients receiving home cyclic parenteral nutrition (abstract), 124

Taste sensation, electrical thresholds, cancer patients (abstract), 169
Thiamine, deficiency, patients receiving long-term furosemide (abstract), 41
Total nutrient admixture, stability and compounding techniques, 187
Total parenteral nutrition
calcium glycerophosphate vs. conventional mineral salts, low-birth weight infants (abstract), 170
home, inflammatory bowel disease, 70
long-term, selenium deficiency, case report, 175
Trauma
critical, enteral feeding in patient with, 117
severe, combined parenteral and enteral nutrition, 113
Tumor necrosis factor, increased concentrations, cardiac cachexia (abstract), 170

Undernutrition, effect on insulin deficiency, diabetic rat (abstract), 169

Washington Review, 1, 97, 149
Weight loss, immediate postoperative enteral feeding effect rat (abstract), 288
Wine, bacterial contamination, letter, 133
Wound healing, immediate postoperative enteral feeding effect rat (abstract), 288
